Question 1
Which of the following statements accurately describe Linux's online global community? Select three answers. 1 / 1 point
The community is focused on collecting feedback from advanced users of Linux.
==Linux users can find support from the community for everyday tasks.==
Correct
Linux's online global community enables users to find support for everyday tasks. Information is published online to help users learn how to operate Linux. In addition, because Linux is open-source, members of the community can easily contribute.
==Because Linux is open-source, the community can easily contribute.==
Correct
Linux's online global community enables users to find support for everyday tasks. Information is published online to help users learn how to operate Linux. In addition, because Linux is open-source, members of the community can easily contribute.
==The community publishes online information to help users learn how to operate Linux.==
Correct
Linux's online global community enables users to find support for everyday tasks. Information is published online to help users learn how to operate Linux. In addition, because Linux is open-source, members of the community can easily contribute.

Question 2
What does the man command do? 1 / 1 point
Display a description of a command on a single line
==Display information on other commands and how they work==
Temporarily grants elevated permissions to specific users
Delete a user from the system
Correct
The man command displays information on other commands and how they work. For more information about a specific command, enter this other command after man.

Question 3
What does the whatis command do? 1 / 1 point
Display information on other commands and how they work
Temporarily grants elevated permissions to specific users
Return the username of the current user
==Display a description of a command on a single line==
Correct
The whatis command displays a description of a command on a single line. It is useful if you do not need the additional details found in the entire man page.
Question 4
What is an advantage of the apropos command? 1 / 1 point
It can be used to search for descriptions of commands when you know the specific command name.
It condenses the description of a specific command to one line.
It incorporates mandatory options for customized searching
==Users can search for a command even if they do not know the specific command name.==
Correct
Users can use apropos to search for a command even if they do not know the specific command name. The apropos command searches the manual page descriptions for a specified string.
